

UPSTATE DOOR[®]

FINE DOOR SOLUTIONS... ONE SOURCE

Upstate Door specializes in distinctive, one-of-a-kind doors.

We make the complicated simple. We can easily accommodate unusual or unique sizes and shapes, making us a perfect partner for distinctive projects. Our staff of drafters, engineers, craftsmen, and customer representatives streamline the ordering process for you, and are here from the start of the proposal all the way to installation day!

Accompanying an industry-leading product with personalized service, Upstate Door is able to take your vision and make it a reality.

THE UPSTATE DIFFERENCE

Looking for something unique or different? We can create exactly what you're looking for: custom doors, made-to-order to your specifications. Contact our door experts to get started!

WHAT STYLES DO WE OFFER?

Interior	Fire Rated	Art Deco
Exterior	Flush	Colonial
Screen/Storm	French	Contemporary
MDF	Impact Rated	Craftsman
Barn	Louver	French Country
Bifold	Oversized	Historical
Bypass	Pivot	Modern
Carriage	Plank	Traditional
Clipped Corner	Pocket	Tudor
Coastal	Slide	Victorian
Dutch	Tongue & Groove	And More!

All of Upstate Door's products are engineered and handcrafted in the USA between our two facilities in Western New York.

For questions, please call our door experts at 800-570-8283

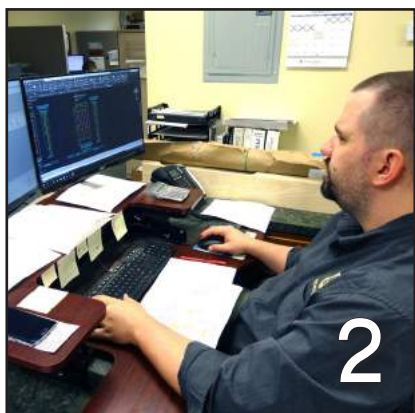

THE UPSTATE DOOR PROCESS

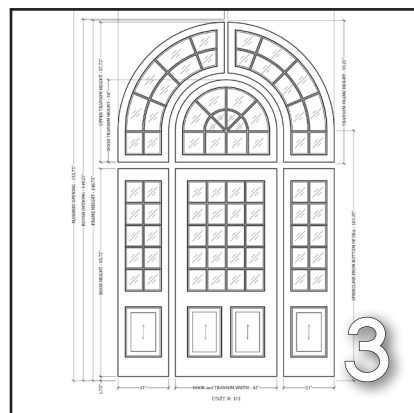

Talk With Our Experts

Together, we will discuss the design and specifications to ensure your satisfaction.

Receive a Proposal

Our team will take your specifications and create a proposal.

Design Approval

We will seek your approval that the design and technical drawings meet your needs.

Door Production

Our master craftsmen carefully construct and create your door.

Factory Finishing

All six sides of the door can be finished in the factory before being shipped.

Shipping

The doors are shipped to you on our trucks to ensure safe arrival.

TABLE OF CONTENTS

We blend old-world craftsmanship with state-of-the-art technology to produce unique, custom interior and exterior doors. When you choose Upstate Door, you know you will receive a beautiful handcrafted work of art that fits your needs and is completely personalized to your style.

DISTINCTIVE SOLUTIONS VS. CLASSIC SOLUTIONS

Upstate Door offers two different product lines: Distinctive Door Solutions and Classic Door Solutions.

Each line is comprised of hand-crafted, unique fine wood and MDF doors. Each door is constructed the same way with the same high-quality materials, even though they are part of two different product lines. All doors feature genuine stile and rail construction, floating panels, and joints that are glued and doweled. Exterior joints receive marine epoxy, and interior joints receive exterior grade glue. Each door moves through production and gets worked on by our craftsmen with a high level of expertise and attention to detail.

<u>DISTINCTIVE DOOR SOLUTIONS</u> <i>Uniquely Crafted</i>	<u>CLASSIC DOOR SOLUTIONS</u> <i>Semi-Custom & Value</i>
Architecturally Driven	Select Options + Build
Your design can be completely custom to meet your specifications (ie: layout, sizes, profiles, species, jambs, etc.)	Your design must fall under our predefined parameters (ie: layout, sizes, profiles, species, jambs, etc.)

MATERIAL SELECTION

We offer two different materials to construct your door out of: wood and MDF. Both are high quality options, but each are recommended for different applications.

DOUBLE REFINED MDF

MDF is highly recommended for paint grade applications as it offers a crisp and smooth painting surface.

More cost effective

More structurally stable

Smoother painting surface

Provides a higher sound barrier

WOOD

Wood is highly recommended for applications where the customer wants the natural look of wood grain, which can be enhanced by stain or a clear top coat.

Offers a natural, tight wood grain

Lightweight for an easy swing

Provides the natural strength of wood (inserts are not needed)

Made of 100% natural materials

Heirloom Quality

MDF DOOR SOLUTIONS

APPLICATION

MDF offers a crisper profile and smooth surface for painting, which is ideal for interior applications.

QUALITY

We use double refined MDF, which is stronger and denser than standard MDF.

CONSTRUCTION

All joints are coped and doweled to create a long lasting product.

STRENGTH

A solid wood insert is installed on the hinge and strike sides with 7 points of contact which is engineered for increased surface area.

STYLE

All doors, whether wood or MDF, can have the same profile or sticking to ensure a cohesive design in the home.

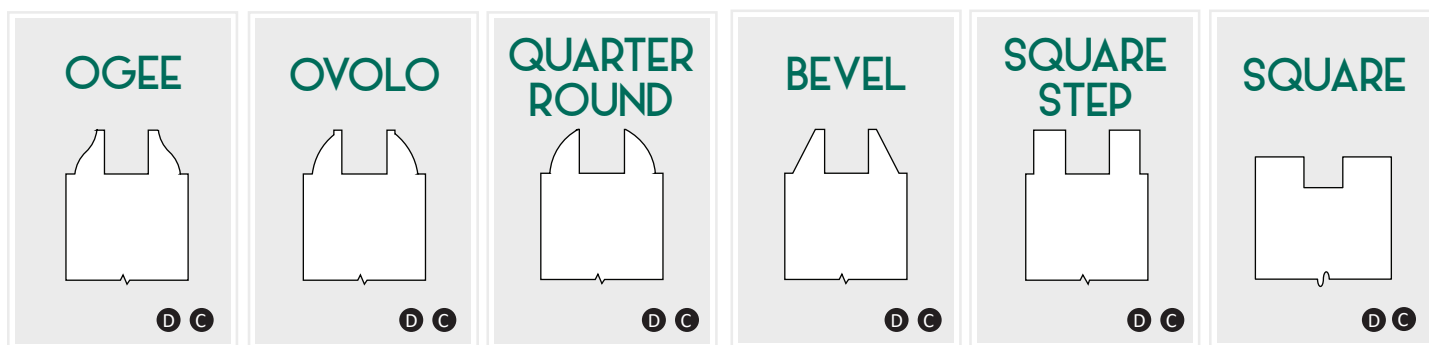

MACHINING

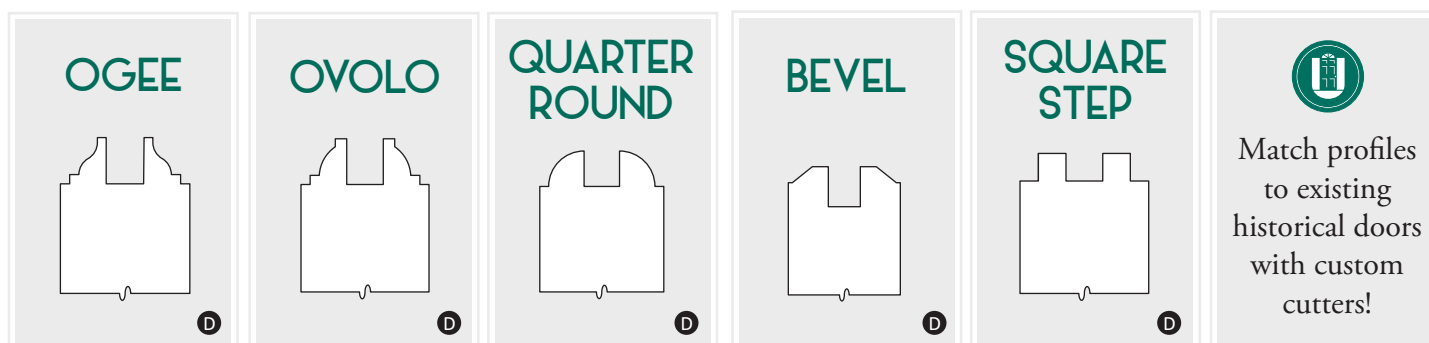

Doors are machined using state-of-the-art CNC technology. We downsize, bevel, and machine for hardware.

STICKING OPTIONS

STANDARD STICKING OPTIONS:

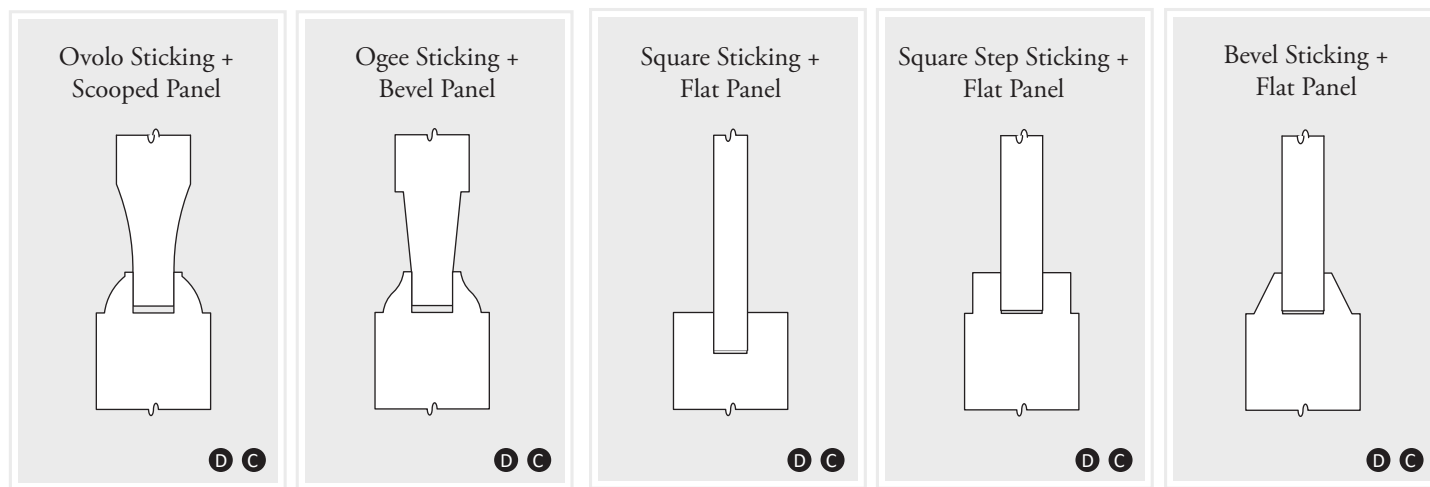

ARCHITECTURAL STICKING OPTIONS:

Ask us about additional Distinctive sticking options!

COMMON LAYOUTS

Truly customize your door by selecting two different panel options for each side. This is a great solution to have the front of an exterior door look different than the back, or for rooms that have different aesthetics. To customize your door even further, choose different species for each side.

To view specific dimensions for sticking and panels, please visit our website. Contact us today to create your own custom design!

WROUGHT IRON APPLICATIONS

We pride ourselves on using vendors that value the same craftsmanship and commitment that we do. Our wrought iron vendor is a prime example of a company that produces quality architectural metalwork for custom doors. Please note that even though we only are showing a few different options below, these are just a small sliver of what can be done and are there to inspire your next dream door!

For questions, please call our door experts at 800-570-8283

FRAMES

Many variables affect the difficulty of hanging a door in the field. The manner in which a door is hung will determine how it looks and performs after installation. Items such as reveals, machining, and the type of frame will have an impact on the end result. Let us help you choose the right options for your job!

MULTIPOINT HARDWARE

Protecting your home, your loved ones and your investment is top priority at Upstate Door. Multipoint locking options are available on virtually every exterior application we build, adding security and stability to your door.

Constructed in stainless steel, our G-U Multipoint hardware options provide a secure locking system for your exterior doors. The 3 point locking mechanism comes in an adjustable or standard 36" handle height and, as an added benefit, improves the structural integrity of your door. This minimizes warping caused by severe weather conditions and/or the natural movement of wood itself.

Both the G-U Secury Automatic and the G-U S-Bolt multipoint hardware options offer the following solutions:

- Constructed out of stainless steel
- Lock over lever w/American cylinder
- 1" throw on deadbolt
- Independent locking system (babysitter function)

Let Upstate Door create a distinctive door solution for you by customizing a door with a multipoint hardware system to meet your needs.

S-Bolt

Automatic

DOOR CONSTRUCTION

Each door receives individualized attention from our expert craftsmen. Our doors are built to your exact specifications. Premium materials are always used; each piece of lumber is hand selected for quality and our MDF is double-refined to ensure crisp details and the smoothest paint application available.

Genuine stile and rail construction

Stave core stiles are used for structural stability

Joints are coped and doweled to create a long lasting, high quality product

Muntins are doweled for added strength and support

Different cores are available based on different applications to maximize stability

Raised and flat floating panels are standard

Marine epoxy is used on exterior doors; exterior grade glue is used on interior doors

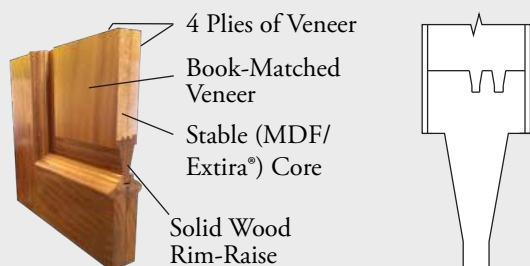

CNC machining is used on every unit to create hinge pockets, jambs, details, etc.

Elegance

PANEL CONSTRUCTION

Paneled wood doors offer a classic look that people often want for their homes. Within the door industry, there are four types of panel construction methods. Each panel varies in construction and style. We adhere to AWI Premium Specifications when possible.

STANDARD: RIM-RAISED PANELS WITH BOOK-MATCHED VENEER

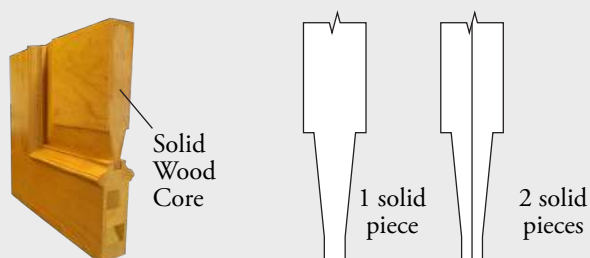

Book-matched veneer, horizontal and vertical;
Limited movement

PREMIUM: RIM-RAISED PANELS WITH SOLID WOOD PLANKS

1/8" solid wood planks (vertically matched);
Limited movement

ALSO AVAILABLE: SOLID WOOD PANELS

Only warrantied in panels narrower than 14"

Rim Raised Panel Construction

Ask us about creating stationary windows to complement your sidelites!

STILE CONSTRUCTION

One downside of a solid wood stile is that solid wood has a tendency to move, causing a door to warp. To minimize warpage, we glue different boards together in alternating directions. If the boards try to warp, they end up fighting against the other boards and are held straight. Upstate Door craftsmen take these pieces of wood and glue a solid, thinner piece of wood to each face and edge. By doing this, we create a product that appears as a single piece of wood but is much more stable than solid wood.

SOLID CORE

Available with many designs

STAVE CORE

Required based on specific parameters

LVL CORE

Made-To-Order

CNC MACHINING

Every door we manufacture is machined using a CNC router, making the tolerances extremely accurate. We pride ourselves on offering high quality doors that fit properly while offering architectural detail.

CONSISTENCY

CNCs offer a horizontal aggregate; the door is held flat while it is being machined. Everything is done consistently, such as beveling or depths of hinge pockets.

FLEXIBILITY

We have complete flexibility with any type of door, so creating custom door layouts or accommodating custom hinge layouts is never an issue.

ACCURACY

Tolerances are extremely accurate, which makes every made-to-order unit detailed and precise.

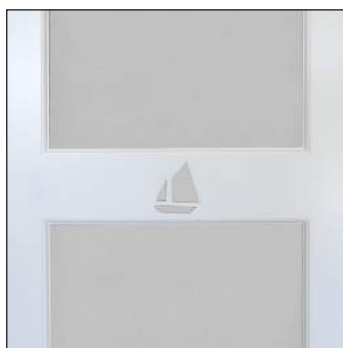

We can accommodate any door in any design. Personalize your door with kerfs, grooves, beads, or other intricate designs for added architectural elements.

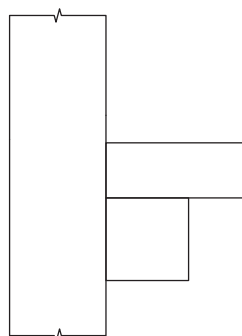

DECORATIVE OPTIONS

Personalize your door with applied pieces of decorative MDF or wood, or have a decorative item carved out of a midrail or panel! Our CNC technology allows us to create different shaped panels. Choose from standard options or have our CAD drafting team create something completely unique.

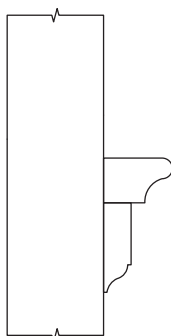

DECORATIVE SHELF OPTIONS

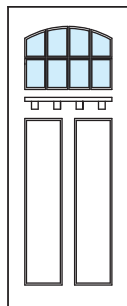

Add a shelf to any unit for a vintage Craftsman style. Ask us about including shelves on Distinctive sidelites!

Looking for something different? Contact us to discuss other options, or create your own design!

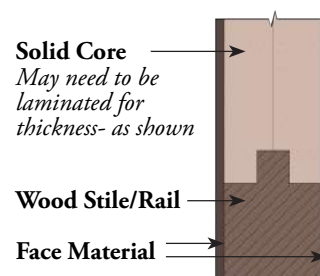

FLUSH DOORS

Utilizing a bonded solid core and lumber hand-selected by experienced workers, our flush doors come in custom sizes and are all available to be prehung. We offer specialized options, such as portholes, speak-easies, v-grooves and engineered core material.

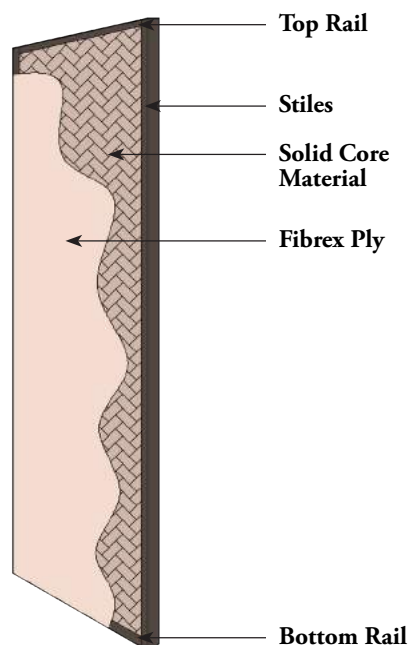

Upstate Door offers flush doors in paint grade or stain grade for both your interior and exterior door needs. Each door is created with the following standard Upstate flush door features adding strength and durability, as well as, reducing the risk of delamination.

- Dado construction between the core and solid material
- Solid wood edge banding for stiles and rails
- Edge banding is doweled and glued at meeting stiles and rail joints
- Interior doors with a solid core (core material depends on application)
- Exterior doors with a solid Extira® core, planks, and stave core to resist moisture and rot
- Matching edge & face wood species used throughout door
- Fibrex skin is used for interior paint grade flush doors

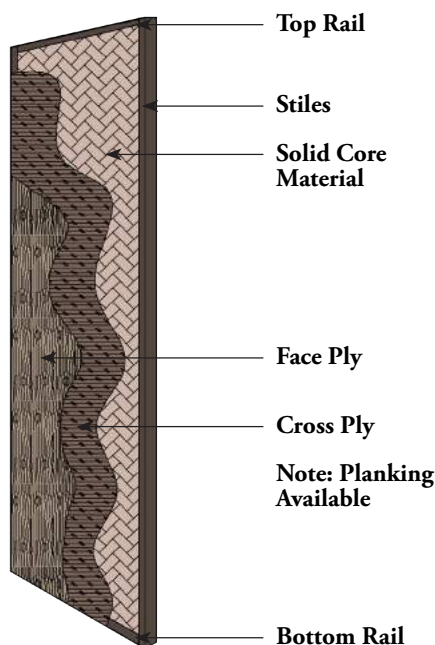

Both interior and exterior flush doors are warranted under Upstate Door's standard warranty guidelines.

Paint Grade or Stain Grade Exterior

COMMON FLUSH DOOR LAYOUTS

CUSTOM FLUSH DOOR LAYOUTS

Talk to us about adding specialty glass, custom veneer, kerfs, or grooves to your design!

PIVOT DOORS

A pivot hung door swings on a set of pins mounted to the floor and head jamb, and in the top and bottom of the door. This offers a seamless transition from the door to the wall, highlighting clean lines and modern architecture.

Interior pivot doors are typically used in kitchen applications for convenience and functionality. Exterior pivot doors are preferred in modern and contemporary style homes. For exterior applications, offset pivot doors are a viable solution.

All doors are built completely to your specifications. Our team of knowledgeable sales people and engineers provide excellent attention to detail and offer construction advice to ensure the door will work perfectly in each specialty application.

Contact us to help determine which hardware is best for your door!

OVERSIZED DOORS: CARRIAGE + BARN DOORS

We can easily accommodate unusual or unique sizes and shapes, which makes us a perfect partner for distinctive oversized doors.

We know that oversized doors need extra attention and we offer solutions to make them structurally sound. We offer custom oversized panel, glass, or flush doors: if you can dream it, we can come up with a way to make it.

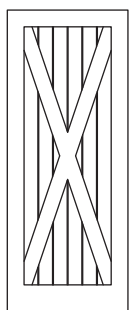

Standards include:

- Engineered cores, stiles, and rails to limit movement
- The right hardware for your specific application to reduce warpage or sagging
- A custom door built to your specifications
- An opportunity for you to speak directly with our engineers so we know exactly what you're looking for

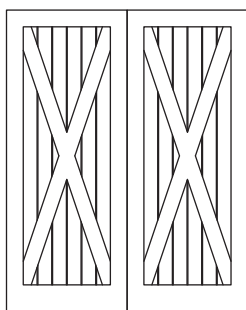

Oversized door options include:

- Barn doors
- Exterior pivot doors
- Carriage doors
- Flush doors

COASTAL DOORS

Why compromise elegance for function when you can have both? Upstate Door offers fine wood door solutions specifically designed for coastal areas. We can help you get the sophistication and style of a wood door in an area with high winds, water, and humidity and still have it look like the day you received it.

The minimum door thickness for coastal applications is 2 ¼"

Solid rails eliminate the possibility of delamination

Marine epoxy is used to glue the joints, reducing joint movement

Engineered drip and rain caps are included to help push water away from the unit

Multipoint hardware helps protect the door from high winds and water infiltration

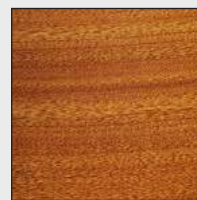

Blockade sills are required because they help drain water away from the door

Additional weatherstripping is used to help keep water away from the unit

Stainless steel screws and hardware will not rust when exposed to the elements

Mahogany wood is preferred because it is durable and more resistant to extreme weather

Factory finishing is encouraged to protect hard to reach areas and ensure the entire door is sealed

Intricate

Homes built in coastal areas are exposed to extreme weather conditions that will take years off the life of a lower quality door. Let Upstate Door meet these challenges and provide a door that will exceed your coastal expectations!

For questions, please call our door experts at 800-570-8283

IMPACT RATED DOORS

Our Distinctive Exterior Custom Door Solutions are available to meet your building code requirements for home safety and greater property protections in hurricane-prone areas. Our doors are built for coastal environments and are resistant to a Category 3 hurricane, with sustained winds up to 129 mph. The minimum thickness for each impact rated door is 2 1/4".

SLIDING DOORS

For indoor/outdoor living enjoyment, a custom hardwood lift and slide door is the perfect combination of visual appeal, function, and quality. Every sliding door is manufactured using Upstate Door's standard construction as well as:

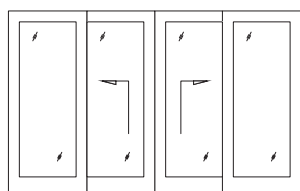

- Lift locking mechanism
- Dual weather seals around the perimeter of each door
- Insulated safety glass
- Wood sill
- Minimum 2 ¼" door thickness
- Aluminum or black guide finish
- Wood screen/storm sliding door available to complement your slide door
- Uni-directional or bi-parting configurations

LOUVER DOORS

Louver doors are charming interior doors with shutter-like slats that are perfect for rooms that need airflow, such as closets, laundry rooms, or rooms with digital equipment. Louver doors also work well in some exterior applications, such as in a pool house.

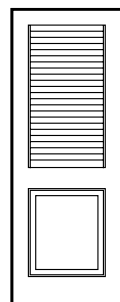

Create your own louver door by adding slats to any layout to match the rest of the doors in the home.

DUTCH DOORS

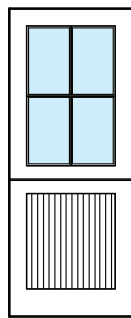

A Dutch door is a two-piece door that offers flexibility of design. The top and bottom portions can be opened together or independently of each other. Our Dutch doors differ greatly from the competition because most manufacturers simply cut a door in half and call it a Dutch door. We create two separate smaller sized doors and fit them together in the jamb. This allows you to adjust the middle rail to accommodate where you want the handle to be. The top can also be visually different from the bottom.

Quadrant hardware holds both halves of a Dutch door together. These are available in a variety of finishes to match your door hardware.

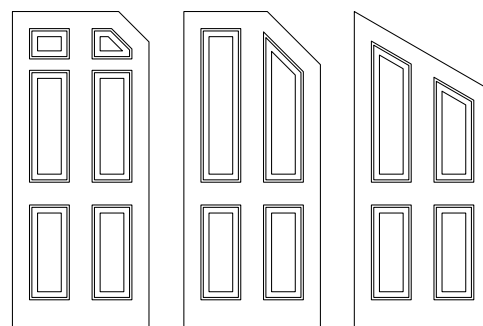

We offer custom shelf details, half lap and ship lap details to compensate for exterior weatherstripping

CLIPPED CORNER DOORS

Clipped corner doors are the perfect solution to accommodate rooms with angled ceilings, such as an attic or under stairs. Virtually any layout can be modified to become a clipped corner door.

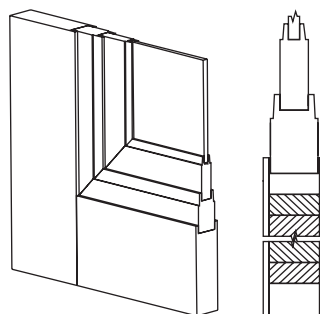

POCKET DOORS

Pocket doors are a great way to showcase architectural detail in a room where you're looking to save some space. These doors are a great solution for closets or bathrooms where there isn't enough room to open and close a full swinging door. Another option is to use them to partition one room from another to offer added privacy.

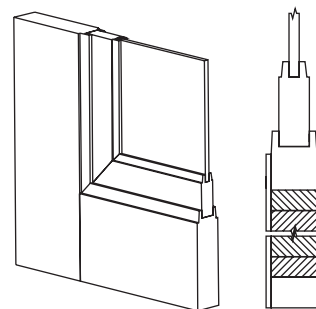

MIRACLE DOORS

The Miracle Door is a historic door design that originated in the 1920s. The elegant door-within-a-door design was copied by many manufacturers during the 1930s and 1940s because of its simplistic design and structural stability.

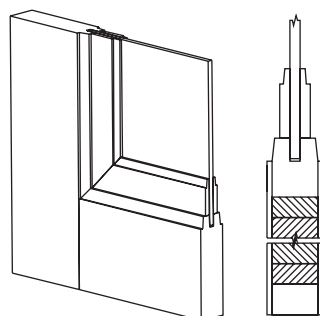

Upstate Door offers an elegant, historical design paired with structural stability for the person looking to match historical charm throughout a home!

HISTORICAL REPLICATIONS

Upstate Door can easily accommodate unusual or unique sizes and shapes, which makes us a perfect partner for historical projects. We have the capability to match historical architectural details of many glass options or door layouts. We know that historical projects are challenging and we are willing to embrace that with professionalism and dedication to make sure that your historical door project is exactly what you are looking for.

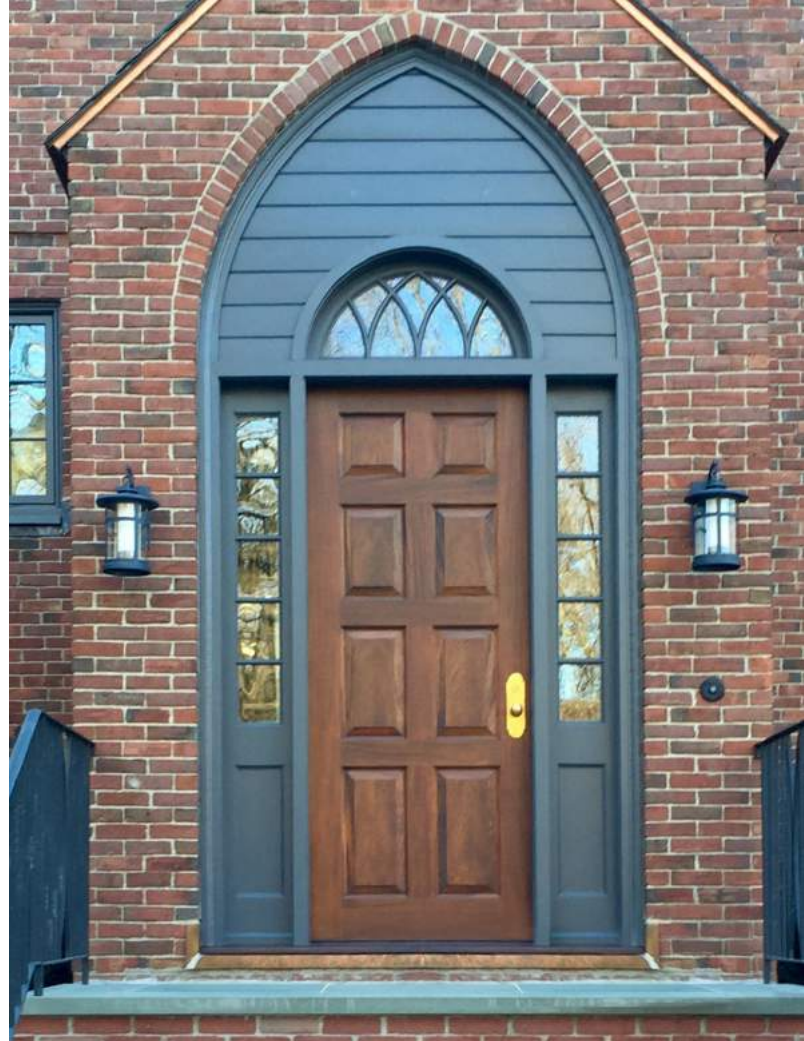

COMMERCIAL DOORS

Upstate Door commercial doors are constructed to handle the demands of everyday use. Each door can be built according to your specifications. Talk to one of your door experts today to determine the correct hardware application!

For questions, please call our door experts at 800-570-8283

FINE FINISHING SOLUTIONS

Below are Upstate Door's variety of stain options featured on African Mahogany. We can also produce split finishes to match the outside of the home as well as the inside of the home. All of our finishes are a sheen-30 (satin) finish. We have the ability to match paint colors from many major manufacturers; just provide a color name or ID code and we can do the rest. Or, select just a clear top coat to highlight the natural beauty of the wood.

WHY SHOULD UPSTATE FINISH YOUR DOOR?

Helps activate the product warranty; see the guidelines on the next page

The top and bottom of the door are sealed to prevent water infiltration

Our finishing is done in a controlled environment to prevent dust or other imperfections getting in the finish

The finish is sprayed, not brushed, to offer a more consistent coating

Our finish expands and contracts with the natural movements of the wood without cracking or peeling

Finishing by the manufacturer ensures hard-to-reach areas are covered, including:

- Behind the glass (we paint or stain before the glass is installed)
- In and around all areas that were machined for hardware (behind the hinges, inside the bore)
- Behind the sticking and the spline of a screen
- Backside of the muntins and jambs
- All six sides of a door (front, back, top, bottom, and both side edges)

PAINT + STAIN PACKAGES

Why should you choose a factory finish package from Upstate Door? Industry standard warranties mandate that sealing all surfaces of your door is required shortly after your product is delivered. Having Upstate Door paint or stain your unit will give you peace of mind that this warranty stipulation is addressed immediately.

WARRANTY

Upstate Door Inc. (Upstate) strives to produce superior quality doors that are engineered and designed specifically for each individual customer. Our products are intended to stand the test of time under normal conditions and use with proper handling, installation, finishing and on-going care.

Subject to the terms and conditions contained in paragraphs (I) through (VI) below, Upstate warranties all of our products “for (1) year” from the original date of delivery of the product against: (a) defects in workmanship, (b) defects in materials and (c) door warping. In the event of a covered warranty claim, Upstate will, at our discretion: (a) repair the affected product; (b) replace the affected product in its original state of purchase; or (c) refund the purchase price of the original product. Call or Email our Custom Door Experts to assist you.

I. LIMITATIONS AND EXCLUSIONS

- Upstate is not responsible for the removal, reinstallation or refinishing of any product other than the original state the product was sold in.
- It is the responsibility of the customer to keep accurate records of proper maintenance (according to the manufacturer of the finishing agent chosen), including, but not limited to, dated receipts and pictures.
- Upstate does not warranty any products that have not been installed in accordance with Upstate’s installation instructions.
- Damage caused by an event within the coverage of any insurance or casualty policy of the customer is excluded from warranty.
- Additional limitations and exclusions may apply in some custom applications.
- Defect in materials do not include checks or splits within a 1/32” x 3” tolerance.
- The natural characteristics of wood movement cannot be warranted, as slight shrinking and expansion may occur under certain conditions.
- Only the products meeting the following stile & rail standards, on-flat dimensions are covered by this warranty. All other products are sold “as is.”

Dimensions are as follows:

With Stave Core:		Without Stave Core:		Flush Doors:
Interior		Interior		Exterior
Stiles	- 3.5” min. or - 4.5” min. with mortise	Stiles	- 4” min. or - No warranty if mortised	with mortise must have 4” edge banding and a plank construction to maintain warranty.
Top Rail	- 4” min.	Top Rail	- 4” min.	
Bottom Rail	- 6” min.	Bottom Rail	- 6” min.	
Exterior		Exterior		
Stiles	- 4” min. or - 5.5” min. with mortise	Stiles	- 4.5” min. or - No warranty if mortised	
Top Rail	- 4.5” min.	Top Rail	- 4.5” min.	
Bottom Rail	- 7” min.	Bottom Rail	- 7” min.	

The following are excluded from warranty:

1. Doors wider than 42” and/or taller than 96”.
2. Interior doors less than 1 3/8” thick or exterior doors less than 1 3/4” thick.
3. Interior Pocket, full glass, or full panel doors without stave core stiles.
4. Doors containing solid wood panels wider than 14”. Upstate standards dictate that panels shall be made using Extira/MDF cores, wood edge-banding and veneered faces to reduce the amount of movement in the panels.

11. DOOR WARPING

Door warping is not considered a defect unless it exceeds one of the following guidelines:

- The warp is greater than 1/4” in doors that are 1 3/8”, 1 3/4” or 2 1/4” thick and up to 42” wide and 84” tall.
- The warp is greater than 3/8” in doors that are 1 3/4” to 2 1/4” thick and up to 42” wide and 84” to 96” tall.

The following are excluded from any warranty for door warping, bowing or twisting:

- A flush door that contains different wood species (split finish) of face veneers and/or planks on each side.
- The door has product/material applied to the face (i.e. mirrors, chalkboards, clothes hangers, etc.).
- The door was not completely finished/sealed with at least two (2) coats of paint, approved sealer, or varnish on all surfaces of the door, including hinge pockets and all machined surfaces, within one (1) week of delivery.
- Screen/storm doors are not warranted against warp, bow or twist.

Note – Door warping refers to the door itself, not to the appearance of the door hanging in relation to the jamb. Please see the “How to check for door warpage” worksheet and video to find out more.

III. VOIDING WARRANTY

This warranty shall terminate, and Upstate shall have no further obligation under this warranty if any of the following occur:

1. The door/product is not finished, painted, or sealed within one (1) week from delivery of the items.
2. All surfaces of the door/product are not finished, painted or sealed, including the top edge, bottom edge, front, back, door side edges and under/behind all hardware and weather seals (all 6 sides).
3. The customer accepts delivery of the product (formal acceptance is not required) and chooses to keep the product for more than 30 calendar days with reasonably obvious nonconformity and/or damage including any and all machining.
4. An Exterior door is not protected by an adequate overhang. An adequate overhang is determined by the distance from the bottom of the door/sill to the underside of the overhang (face height). To conform to this warranty, the overhang must project a minimum of one half of the face height dimension. See the Upstate Door installation instructions for more information.
5. The door is trimmed more than ¼" from either side, ¼" from the top, or 1" from the bottom.
6. The door has been finished with a distressed and/or sandblasted surface.
7. The door is finished with dark paint or stain or with inadequate, excessive, or neglected finish.
8. The door is exposed to the elements prior to being properly finished. (Factory priming is not a proper finish).
9. The distributor, contractor or end customer attempts to repair the product or alters the product in any way without written consent from an authorized Upstate representative.
10. An interior door is exposed to adverse or improper conditions, including but not limited to, installation directly in front of a heating or air conditioning duct, in a high humidity area such as a pool house or steam room, or in areas of extreme temperature variation, etc.
11. The door is damaged because of carelessness or negligence of the distributor, contractor or end customer.
12. Any modifications made to the product or misuse of the product that Upstate deems in its sole discretion to be the cause of the alleged product failure, will void this warranty.
13. The door was shipped outside of the continental United States.
14. Damage is caused by extreme environmental conditions or outside forces such as pressure washing damage.
15. The one (1) year warranty term has expired.

Note – Natural wood color variations and/or wood texture variations are not considered to be defects.

IV. WARRANTY CLAIMS

Immediately upon discovering any nonconformity and/or damage to the product, which is believed to be covered by warranty, you must:

1. Email or mail a detailed written description with photos of the nonconformity and/or damage to an authorized representative from the distributor you purchased the product from or directly to Upstate Door Inc.
2. All warranty claims must be submitted in writing within one (1) year of the original date of delivery.
3. Send accompanying photographs of the nonconformity and/or damage to the product. Please ensure the photos are not blurry and that they clearly identify the problem to avoid delay of the process.
4. Please see Upstate Door warranty claims link on the website for further details.

V. EXPRESS LIMITATION

THIS LIMITED WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR USE, OR OTHERWISE. OUR LIABILITY IN THE EVENT OF BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, OR OTHERWISE IS STRICTLY LIMITED TO REFUND OF THE PURCHASE PRICE OR REPAIR OR REPLACEMENT OF THE DEFECTIVE PRODUCT. IN NO EVENT SHALL UPSTATE BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES AS DEFINED IN THE UNIFORM COMMERCIAL CODE. THIS WARRANTY SHALL BE VOID IF OUR PRODUCT IS USED OR MODIFIED IN A MANNER OTHER THAN IN ACCORDANCE WITH THE WRITTEN INSTRUCTIONS PROVIDED BY US.

VI. DISCLOSURE

Formal acceptance of this warranty is not required. By accepting delivery of the product, the customer is also accepting the terms and conditions of the Upstate Door Inc. limited warranty.

USE AND CARE GUIDE

General Door Handling & Care

1. Once your door(s)/unit(s) are delivered, be sure to carefully inspect the entire delivery for any visible defects (If you find an issue, please contact your Upstate Representative immediately).
2. DO NOT drag or slide one door across another door or along any other hard surface that could damage the door.
3. Doors should be stored flat or on a flat surface that is well ventilated. NEVER lean doors against a wall.
4. Cover door(s)/unit(s) to help keep them clean, ensuring that they have adequate airflow to all sides.
5. Door(s)/unit(s) should not be exposed to extreme heat, dryness, humidity and drastic changes in conditions.
6. DO NOT store door(s)/unit(s) in direct sunlight.

Preparation for Finishing

1. All door(s)/unit(s) should be given a few days between delivery and finishing to acclimate to the relative humidity of the location.
2. Door(s)/unit(s) must be sealed/finished within 24 hours of the product installation (this must fall within the 1 week limitation stated in Upstate Door Inc.'s standard warranty).
3. Before applying any type of finishing agent, lightly sand the product with 180 grit sandpaper (always sand in the same direction as the grain direction). Make sure to remove any and all scuffs, dings, fingerprints, scratches and unevenness of grain (that may have occurred during wood acclimation to the relative humidity of the location).
4. Before finishing the door(s)/unit(s), install the product and then remove the door from the unit (also remove all hardware) in order to properly finish the product as stated in Upstate Door Inc.'s standard warranty.
5. If the door(s)/unit(s) have glazing, be sure to apply a generous amount of top coat/finish to bridge between the wood and the glass. If you are painting the product, apply paint with a 1/16" lap onto the glass to provide adequate moisture protection.

Finishing the Product

1. Upstate recommends using a sanding sealer or a conditioner to be applied to the product(s) before finishing, helping in the ease of finishing the product(s).
2. Please use only high quality stain and/or paint to finish your door(s)/unit(s), and carefully follow all of the stain/paint manufacturer's instructions regarding application of the product.
3. If your door(s)/unit(s) are going to be placed in the structure with direct exposure to sunlight, Upstate recommends avoiding dark stains/paints. Excessive heat buildup will push moisture out of the wood, causing your door(s)/panel(s) to shrink and check/crack.
4. Pay careful attention to detail and make sure you seal all surfaces of the product(s) including: front & back faces, top/bottom/left/right edges, hinge pockets and all areas that have been machined for hardware (i.e. flush bolts, mortises, multi-points, etc.).
5. Upstate Door recommends applying a minimum of three (3) finish coats of high quality varnish/paint.
6. DO NOT use lacquer or polyurethane based sealers that do not have a UV inhibitor (applies to exterior applications only).

Long Term Care

1. Finishes that cover the entire door and are maintained properly will ensure a lifetime of beauty in your product(s).
2. Stains and clear finishes should be protected from sunlight and excessive weathering to prolong the finish of the product.
3. Inspect your door(s)/unit(s) on a regular basis (minimum annual inspection is recommended) for imperfections or wear to the finish.
4. During inspection, pay close attention to high wear areas such as around the handle set, the door edges and the bottom of the door where people are most likely to run their feet into the door inadvertently.
5. When refinishing is required, removing the door from the unit and removing all hardware from the door(s)/unit(s) is required.

Disclosure

1. Failure to follow and comply with these recommended guidelines may forfeit the validity of warranty claims.
2. All warranty claims will be reviewed on a case by case basis.
3. Upstate reserves the right to deny any warranty claim due to improper handling and/or care.
4. When an item is replaced or repaired under a warranty claim, Upstate is only responsible for replacing the item in the original state of "finished" condition that the product(s) were originally delivered in.

ARCHITECT ADVANTAGES

We recommend that our Architectural Representatives meet with you and your firm to offer trainings to provide fine door solutions. Ultimately, it is our goal to be a resource to you on your current or next project. We offer a team-based approach, offering time, advice, and solutions at your disposal, while creating and solidifying relationships.

We also offer levels of training based on knowledge and experience level of each architect. Architects are always welcome to join in on a plant tour with any dealer to learn more about our products and to see how we can match detail, alignments, and variety of options offered.

As an architect, you are required to continue your education and maintain your credentials. Upstate Door is proud to offer American Institute of Architects (AIA) accredited trainings.

BUILDER ADVANTAGES

As a custom builder, you want the doors of the home that you're building to be statement pieces. Upstate Door has the capability to create exactly what an architect specs, no matter how unique or detailed. Our doors are wrapped and shipped on our own fleet of trucks. You can feel comfortable knowing that we will create accurate shop drawings and you won't have to worry about the door cracking or failing because our quality and craftsmanship is second to none.

All doors are manufactured using the latest CNC technology. We perform machining for hinge pockets, hardware, downsizing and beveling all before the door is complete. If you are looking for quality, continuity, and accuracy, Upstate Door is the right company to deal with. No matter what kind of door you need, we're here to help you get the best solution for your job and your customer.

MOBILE SHOWROOM
